BELL 222 SIMULATOR TRAINING

Our World-Class Training:

BELL 222 SIMULATOR TRAINING

Henley Air Flight School takes great pride in being the owner of a unique and unparalleled Bell222 simulator. This state-of-the-art simulator is a specialized aviation training device designed to replicate real-world circumstances, allowing aspiring pilots to undergo comprehensive training without the inherent risks associated with actual flight.

We provide a diverse range of specialized scenario-based training options within our helicopter pilot training programs. Our goal is to ensure that each student receives a holistic learning experience that prepares them for any situation they may encounter in their aviation career.

What truly sets us apart is our team of highly experienced simulator instructors. With their extensive knowledge and expertise, they provide invaluable guidance and support throughout the training process. Whether you're looking to enhance your skills in:

- night operations (night rating (NR))
- instrument flying (instrument rating (IR))
- night vision goggles (NVG) usage
- or multi-crew co-operations (MCC)

our instructors are well-equipped to assist you in achieving your goals.

Aspiring pilots can also take advantage of our training programs to accumulate flight hours towards various licenses. Whether you're aiming for a:

- Private Pilot License (Helicopter) [PPL(H)]
- Commercial Pilot License (Helicopter) [CPL(H)]
- Airline Transport Pilot License (Helicopter) [ATPL(H)]

our comprehensive training programs offer the necessary building blocks for your aviation career.

We believe in providing a top-tier training environment that combines cutting-edge technology, experienced instructors, and a wide range of specialized training options. With our Bell222 simulator and comprehensive programs, we are committed to shaping skilled and confident helicopter pilots who are prepared to excel in the dynamic aviation industry.
